REASONS FOR ALLOWANCE

1. Claims 2-21 are allowed.
2. Claim 1 is cancelled.
3. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a FIR filter comprising: a selection control means including a first n-bit shift register, n switching means, and a control means for outputting n unique control signals with shifting a ramp-up/-down signal through successive bit stages under control of a shift clock for the first n-bit shift register; and a multiplying means as seen in independent claims 2, 10, and 17.

The closest found prior art is Hidemitsu (J.P. 411088119A). Hidemitsu also discloses a FIR filter comprising a selection control means including shift register, switching means, and a control means; and a multiplying means. However, Hidemitsu fails to disclose a consistent n-bit shift registers, n switching means, n unique control signals, and an input shifting ramp-up/-down signal as seen above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
